

As of December 6, 2021 MyIR Mobile users will be able to get a temporary SMART Health Card QR code for proof of COVID vaccination. Per the SMART Health Card standards, only state agencies or vaccine providers can be listed on the CommonTrust Network as valid issuers of SMART Health Cards. We have been working closely with the CommonTrust Network to resolve this issue as quickly as possible. To provide our product team and connected MyIR state partners time to meet this requirement, you will be able to get a temporary SMART Health Card starting today.

This temporary SMART Health Card will be verified as valid through February 16, 2022. After February 17, 2022, SMART Health Cards may not be available in every state using MyIR due to the policy rules for SMART Health Cards that require states to be the issuer of the SMART Health Card.

What this means to you:

Log into MyIR to get a temporary, valid MyIR-issued SMART Health Card QR code through February 16 (this QR code will expire at midnight on this date).

Log into MyIR on February 17 to see if your state will be issuing SMART Health Cards. If it is, you will be able to get your new state-issued SMART Health Card for each dose.

If your state does not choose to issue SMART Health Cards, you may contact your state Department of Health for more information.

As always, through your MyIR Mobile account, you can always access a copy of your complete vaccination records, including any Covid-19 vaccines. In addition, in some states, an official state vaccination and school certificate are also available through MyIR Mobile. To use these certificates, MyIR Mobile users will need to show them as either digital PDFs or printed documents to prove immunization status.

Access to your records is our top priority. We understand the simplicity and convenience of needing your record in the right format, and we want to do everything we can to make this easy for you.

Thank you for your patience.
