

As of February 17, 2022, select States have issued State-sponsored SMART Health Card QR codes that allow users to easily and securely share digital vaccine credentials for verification.

Users in the following States can log in to their existing MyIR Mobile account and access their newly issued SMART Health Card QR codes:

- Arizona
- Louisiana
- Maryland
- Mississippi
- Washington

Users located outside of these States can still access their full immunization records, including COVID doses, through MyIR Mobile.

In the future, additional States may elect to issue SMART Health Cards through MyIR Mobile; if this happens, you will receive an email notification with more information.

If you need any assistance with your MyIR Mobile account, please log in and contact support via the live chat tool within your account.
